

New Forest Biodiversity Forum

Impacts of environmental change on biodiversity in the New Forest

Adrian Newton (Bournemouth University)

This presentation will provide:

- A brief overview of the importance of the New Forest for wildlife.
- A summary of research undertaken over the past 15 years into the impacts of different forms of environmental change on biodiversity in the New Forest.
- A brief exploration of the implications of this research for the future of the New Forest, with a particular focus on monitoring efforts.
